Two Day inter college workshop on Analytical profile Index (API) Advance Techniques in Microbial identification

Conducted on 24-10-2018 & 25-10-2018, Time – 09.00AM

Venue – Seminar Hall & Microbiology Lab, KMICS

The aim of workshop is to introduce advance microbial identification by using Analytical profile Index (API). In the present era of technological advancement & competition, where technology get changed within college span, technical information & applications are on the way of Scientific Progression. The fast & accurate learning is the demand of present time and hence the structured learning strategy is our core requirements. We have to introduce them with the world of Advance Microbiology in the practical ways to experience the power of Microbiology for public health and safety. The activities performed were Two days on-campus workshop for 6 Hours, all theoretical portions were covered during the lecture session along with other techniques, testing and question-answer round rather than wasting it in boring theory classes, Hands-on with the technique of API, Directions to use API web. Ms Adhira Senior technician from API demonstrated all the techniques to the students. 100 students from HRD Degree & PG College, Nobel Degree & PG College and KMICS participated in the workshop.
