SOP for course outcome attainment

The IQAC of the college designed a standard mechanism to for calculating course outcome attainment. The procedure is described below.

1. Every question must be mapped to some course outcome (CO).
2. Every question will carry some marks based on the scheme of evaluation.
3. CO attainment is calculated based on the performance of the students in the exam.
 - N_a = number of students attempted the question
 - N_s = number of students who scored above 60 % marks
 - X = % of students scoring above 60 % marks = (N_s / N_a)
 - If $X > 50$ and ≤ 60 CO attainment level is 1
 - If $X > 60$ and ≤ 70 CO attainment level is 2
 - If $X > 70$ CO attainment level is 3
4. If multiple questions are present with same CO, then avg. must be taken to find CO attainment
