

One Day Webinar on Skill Enhancement Programme

“Artificial Intelligence”

Date: 25 th July 2020

Time: 3.00 pm – 4.30 pm

Artificial Intelligence (AI) is an emerging technology and rapidly permeating all industries and having a profound impact on virtually every aspect of our existence. The importance of Artificial Intelligence is educating the next generations in the understanding of the fundamentals of the upcoming scientific and technological innovations i.e Artificial Intelligence (AI) is to understand how machines can learn to autonomously perform different types of tasks that typically require some intelligence on the human side (e.g., object classification and identification, task scheduling and planning, game playing, decision-making, natural language understanding, etc. Recognising this, Department of Computer Science has organized one day webinar on “Artificial Intelligence” on 25th July 2020. The webinar was handled by Mr. Mallikarjun Sanka, CTO CAS Infosol INC, Hyderabad. artificial intelligence

The main objective of this webinar is to provide the participants with depth in the broad area of artificial intelligence focusing on different approaches with a strong technical foundation in computer science. The webinar brought together over 252 participants from various colleges.

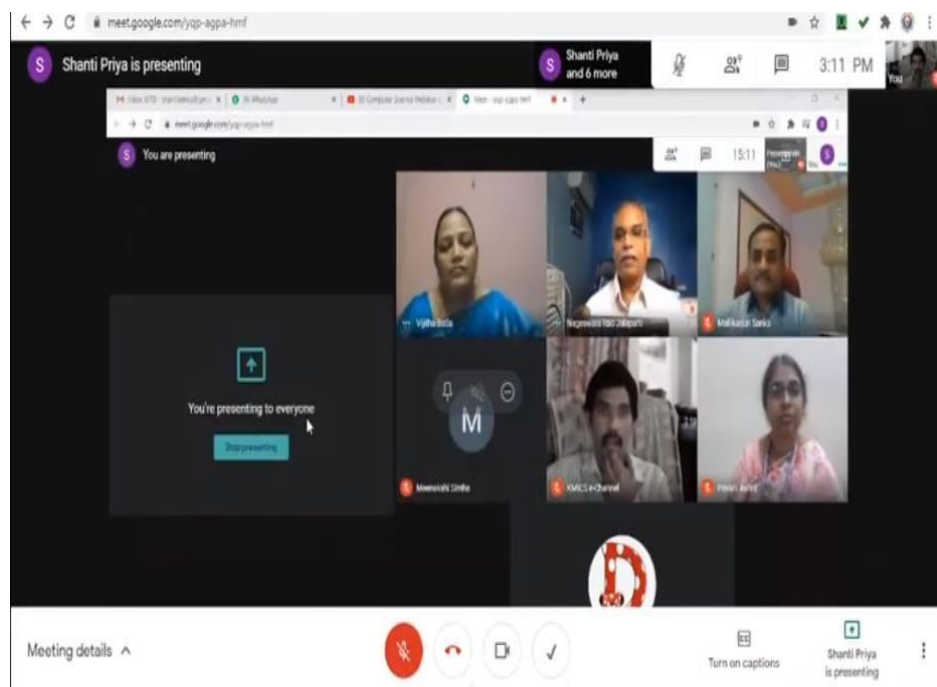

Glimpses of the Webinar:

Resource Person Mallikarjun Sanka

Vijitha Hod,Dept of Computer Science welcoming the resource person Mallikarjun garu ,Principal Dr.J.Nageswarrao garu , Computer Science Dept Faculty and the participants

Resource Person with Dr.J.Naheswararo garu, Principal,KMICS and Computer Science faculty addressing the participants during webinar
